## What's New?

The following is a list of the new features in this release:

- DS620/DS620A Support:** The Mac driver now supports the new DNP DS620/620A printer.
  - 6x9 Media Support:** For DS620/620A printers only. All media prints sizes are supported (6x9, 4.5x6, (4.5x6)x2)
  - Ribbon Rewind Support:** For DS620 printers only. Supports the ribbon rewind feature that is offered with this printer.
  - iSerial Tool:** DS620/620A printers only. This tool activates the iSerial feature in the printer firmware that corrects known issues with the Mac printer driver. The iSerial tool and instruction for installing it can be found on the DNP Imaging Europe website: <http://www.dnpphoto.eu> ( in the MAC driver package ).

## Using Your DS Series Printer for the Macintosh Computer

After installing your driver, you can use the DS620, DS40, DS620A, DS80, DS80D, or RX1 to print from your computer.

### Note

The printer options screen may change slightly depending on the program from which you are printing. Graphic design programs like *Photoshop* or *Illustrator* may have extra settings which are not included in the examples below.

### Attention

The DS40, DS80, DS620, and RX1 printer control panels are all similar, but will present different sets of paper sizes for each respective printer.

## Exploring the Control Panel

From the **Printer Settings** drop-down menu (8), select the **DNP Printer Features** option. By clicking the **Color** or **Image** buttons, you can toggle between the **Color** and **Image** control panels.

### Image Settings

Use the table below to identify the settings available on the image table.
